

Emerson makes it easy to find the right replacement motor.

A typical government building has hundreds of electric motors working to help the business operate effectively and efficiently. If you take a moment to look around you, electric motors are found in almost every area and every function. Electric motors are powering the air circulation, cooling and heating throughout the building and even more.

Whether you are looking for a 1/4 HP motor to power an electric fan, or a 20 HP NEMA Premium® motor to operate a cooling tower motor, Emerson knows that there is little room for error. When it comes to your facility, having the right replacement motor available when you need it is imperative to your success. Emerson understands that when a motor is down, your facility comes to a halt. You need the ability to find the right replacement motor now!

If you are having difficulty finding a NEMA Premium® replacement integral horsepower motor, don't look any further. Emerson offers an extensive line of replacement motors, including motors for use as direct replacements for Dayton®, AO Smith™, General Electric®, Leeson® and Marathon Electric™ motors, and many other motors. From 1/185 HP unit bearing motors to 4000 HP vertical hollow shaft motors, Emerson has a variety of products to meet your needs.

Emerson has the RIGHT tools available to assist you in finding the correct EMERSON® motor to replace your current motor brand quickly. Find more information at www.emersonmotors.com/MRO.
